PROFESSIONAL EXPERIENCE

Oracle Corporation – Redwood Shores, CA

Jun 2013 – Present

Configurator Engineering Product Manager/Developer

- Responsible for interfacing with marketing, operations, engineering, services, development, UX, and QA teams during each release cycle to plan and implement changes in Oracle Configurator application
- Duties include gathering requirements, leading cross functional team meetings, researching new products, and build relationships with clients and stakeholders
- Effectively communicate with external organizations and produce 100% on-time delivery of new product introductions (NPIs) or product updates in the Configurator
- Plan, build, test, and deploy products to Oracle Configurator using Constraint Definition Language (CDL), Oracle's proprietary language, utilizing logic to incorporate all the given requirements

Oracle Corporation – Redwood Shores, CA

Jun 2012 – Jun 2013

Software Quality Analyst

- Maintained workload and quality standards

Critical Logic – San Francisco, CA

Sr. Logic Analyst on Oracle Configuration Engineering Team

Jan 2012 – May 2012

- Increased workload by 25%
- Maintained near 100% bug-free outputs
- Trained and mentored new employees

Critical Logic – San Francisco, CA

Jun 2006 – Jan 2012

Logic Analyst on Oracle Configuration Engineering Team

- Developed test plan, interpreted requirements to create and generate XML test suites, analyzed test results, and filed appropriate bugs
- Generated and analyzed 1000+ automated test cases per testing cycle
- Collaborated cross functionally with product managers, developers, and UX during each testing cycle
- Consistently identified issues during testing phase to maintain high quality outputs

EDUCATION

University of California, Davis – Davis, CA

2001 - 2005

Bachelor of Science in Electrical Engineering

Minor in Technology Management
